

Animal Kingdom

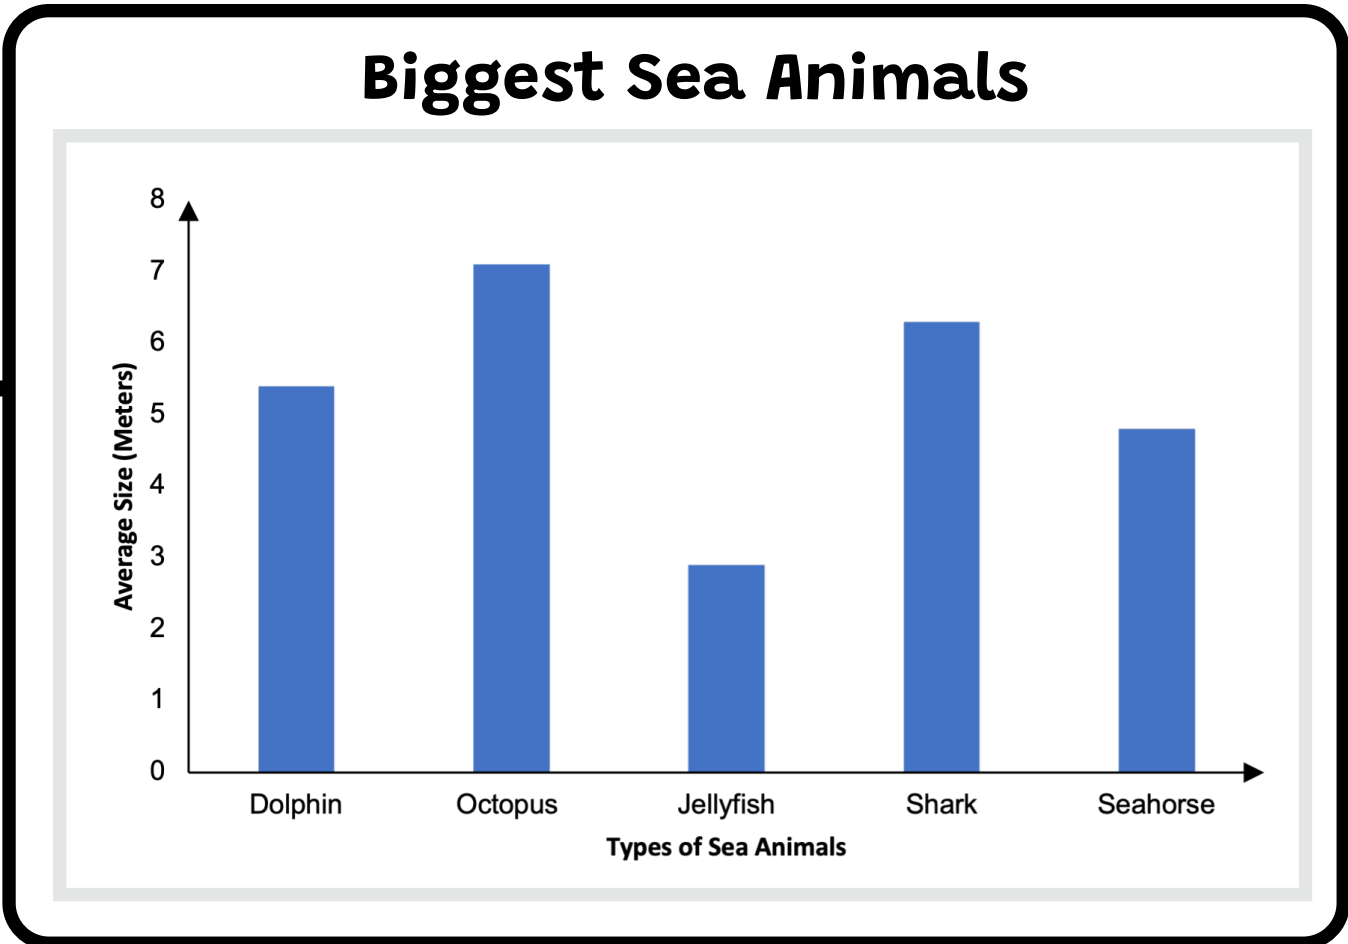

Animals are our firends. In this data story, let's explore the amazing world of animals by looking at where they live, how big they are, and what they eat, and how endangered species are changing over time.

1

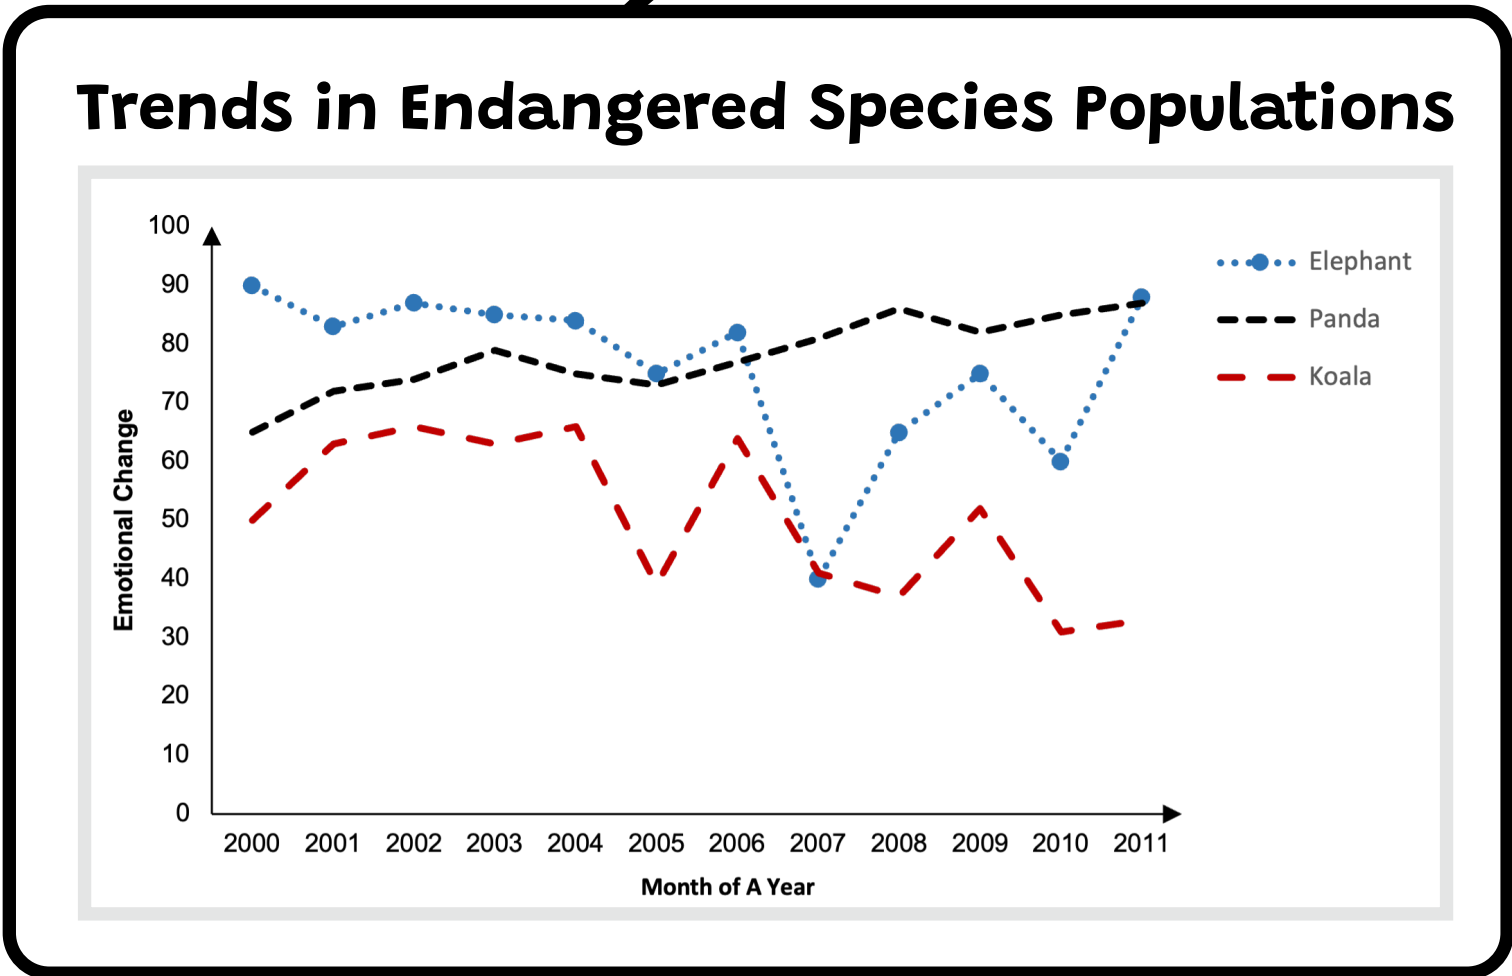

Forests are the most common habitat, while deserts are the least common.

2

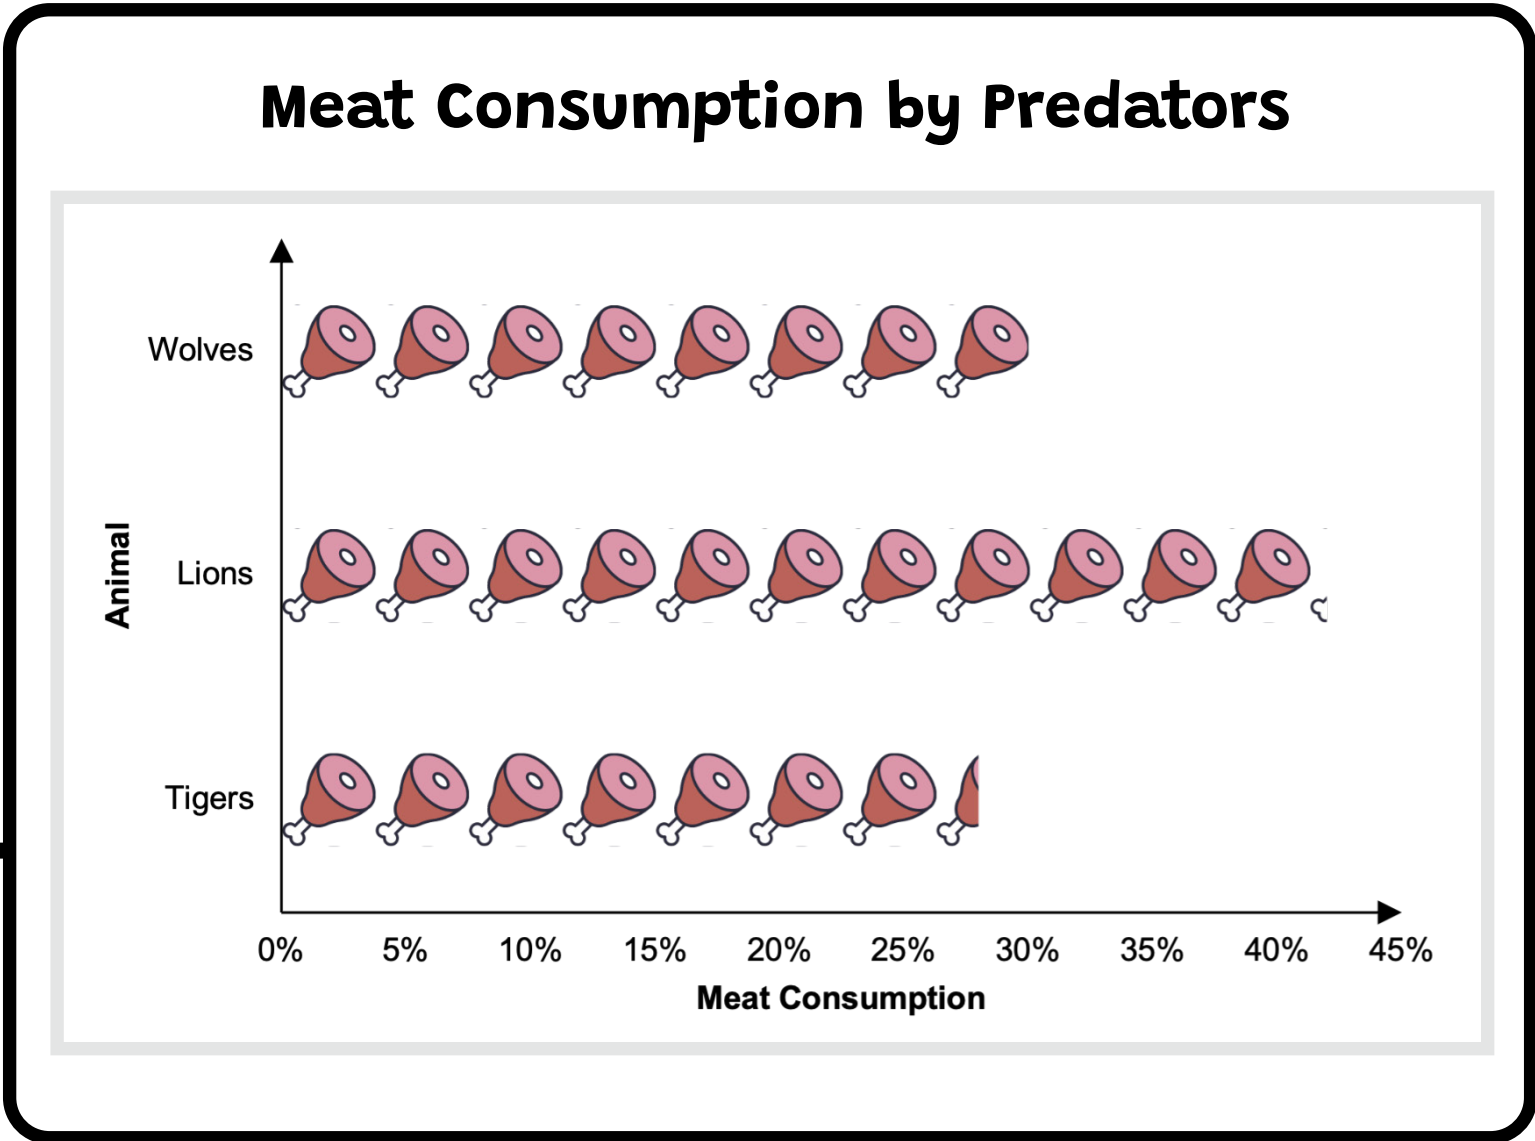

Octopuses are the largest sea animal, with sharks and dolphins close behind.

3

Elephant numbers have gone down a lot because of a spreading disease, while panda numbers are going up steadily because of successful breeding programs.

4

Lions eat the most meat among the three predators.
